DIVISION I – GENERAL

I.11 CURRICULUM AND DEVELOPMENT

The total educational program will be evaluated continuously with respect to its value to the students enrolled. The needs of the community will be considered at all times, and advice will be solicited from citizens advisory committees, especially with respect to the vocational and technical programs. Four-year college and university partners will have critical input into transfer curricula. The faculty will be encouraged to participate in curriculum design. The College will provide encouragement of faculty to develop and/or adapt pedagogical approaches that enhance student learning.
